

Key steps

A) Data Prep

1. Duplicate the 2022 Excel Tab. This new tab will contain the same information but will allow you to manipulate the data without losing the original content.
2. Filter in the column 'Description' – and select only the services that you do not think are relevant professional services.
3. Highlight all of the table -> Home -> Go-to Special -> Visible Cells Only
4. Then right click on the table, which should have selected only the services that you do not want, click on delete, click 'delete entire sheet rows'.
5. Then go back to the filter in the column 'Description' – and the options left for you to select should now be the services you wish to analyse. Select all.

B) Pivot Tables

Table 1 will look to find the expenditure per service description.

Click into the data table -> Insert -> PivotTable -> Existing Worksheet (and select a cell to the right of the data table).

In the PivotTable Field menu:

Drag 'Description' into the 'Row' area.

Drag 'Amount' into the 'Values' area.

Click the second 'Amount' tab -> Value field settings -> Show Value As -> Pick '% of column total' from the dropdown.

☐ PO No.
☐ Supplier Name
☒ Amount
☒ Description

	Sum of Amou...

Table 2 will look to find the expenditure for IT Consulting Services per Supplier

Click into the data table -> Insert -> PivotTable -> Existing Worksheet (and select a cell to the right of the first PivotTable).

In the PivotTable Field menu:

Drag 'Supplier Name' into the 'Row' area.

Drag 'Amount' into the 'Values' area.

Click the second 'Amount' tab -> Value field settings -> Show Value As -> Pick '% of column total' from the dropdown.

Drag 'Description' into the 'Filters' area.

A filter should now have appeared above the Pivot Table. Select the IT services from the filter dropdown.

Table 3 will look to find the expenditure for Business Consulting Services per Supplier

Click into the data table -> Insert -> PivotTable -> Existing Worksheet (and select a cell to the right of the second PivotTable).

In the PivotTable Field menu:

Drag 'Supplier Name' into the 'Row' area.

Drag 'Amount' into the 'Values' area.

Click the second 'Amount' tab -> Value field settings -> Show Value As -> Pick '% of column total' from the dropdown.

Drag 'Description' into the 'Filters' area.

A filter should now have appeared above the Pivot Table. Select the business consulting services from the filter dropdown.

☐ PO No.
